

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1. (currently amended) A method for deploying a device database to a device, the method comprising:
providing an interface that enables a user to reference a device database in a device project and to select an installation property for installing the device database on the device;
deploying the device project to the device in a software development environment;
and
installing the device database on the device for testing of the device on which the device database is being installed, the device database being installed according to a selected installation property that specifies whether or not an existing version of the device database on the device should be overwritten by installing the deployed version of the device database.
2. (original) The method of claim 1, comprising providing an interface that enables the user to reference the device database in a main device project.
3. (original) The method of claim 2, further comprising providing an interface that enables the user to debug a test version of the device database on the device.
4. (original) The method of claim 1, comprising providing an interface that enables the user to reference the device database in a device setup project.
5. (original) The method of claim 4, wherein deploying the device project to the device comprises distributing a finished version of the device database to the device.
6. (original) The method of claim 1, comprising providing an interface that enables the user to select an always overwrite installation property.

7. (original) The method of claim 1, comprising providing an interface that enables the user to select an overwrite if different installation property.
8. (original) The method of claim 1, comprising providing an interface that enables the user to select a never overwrite installation property.
9. (currently amended) A computer readable medium for deploying a device database to a device, the computer readable medium comprising computer executable instructions for performing the following steps:
 - providing an interface that enables a user to reference a device database in a device project and to select an installation property for installing the device database on the device;
 - deploying the device project to the device in a software development environment;
 - and
 - installing the device database on the device for testing of the device on which the device database is being installed, the device database being installed according to a selected installation property that specifies whether or not an existing version of the device database on the device should be overwritten by installing the deployed version of the device database.
10. (original) The computer readable medium of claim 9, comprising computer executable instructions for providing an interface that enables the user to reference the device database in a main device project.
11. (original) The computer readable medium of claim 10, further comprising computer executable instructions for providing an interface that enables the user to debug a test version of the device database on the device.
12. (original) The computer readable medium of claim 9, comprising computer executable instructions for providing an interface that enables the user to reference the device database in a device setup project.

13. (original) The computer readable medium of claim 12, wherein the computer executable instructions for deploying the device project to the device comprise computer executable instructions for distributing a finished version of the device database to the device.

14. (original) The computer readable medium of claim 9, comprising computer executable instructions for providing an interface that enables the user to select an always overwrite installation property.

15. (original) The computer readable medium of claim 9, comprising computer executable instructions for providing an interface that enables the user to select an overwrite if different installation property.

16. (original) The computer readable medium of claim 9, comprising computer executable instructions for providing an interface that enables the user to select a never overwrite installation property.

17. (currently amended) A method for deploying a device database to a device, the method comprising:

providing an interface that enables a user to select an installation property for installing the device database on the device, the selected installation property being one of an always overwrite property, an overwrite if different property, and a never overwrite property;

deploying the device database to the device in a software development environment;
and

installing the device database on the device for testing of the device on which the device database is being installed, the device database being installed according to the selected installation property.

18. (original) The method of claim 17, comprising deploying the device database to the device as part of a main device project.

19. (original) The method of claim 18, further comprising providing an interface that enables a user to debug a test version of the device database on the device.
20. (currently amended) The method of claim 17, comprising deploying the device database to the device as part of a device ~~startup~~ setup project.
21. (original) The method of claim 20, wherein deploying the device database to the device comprises distributing a finished version of the device database to the device.
22. (currently amended) A computer readable medium for deploying a device database to a device, the computer readable medium comprising computer executable instructions for performing the following steps:
- providing an interface that enables a user to select an installation property for installing the device database on the device, the selected installation property being one of an always overwrite property, an overwrite if different property, and a never overwrite property;
 - deploying the device database to the device in a software development environment;
 - and
 - installing the device database on the device for testing of the device on which the device database is being installed, the device database being installed according to the selected installation property.
23. (original) The computer readable medium of claim 22, comprising computer executable instructions for deploying the device database to the device as part of a main device project.
24. (original) The computer readable medium of claim 23, further comprising computer executable instructions for providing an interface that enables a user to debug a test version of the device database on the device.

DOCKET NO.: 303661.01 / MSFT-2791
Application No.: 10/719,481
Office Action Dated: November 14, 2006

PROCEDURE PURSUANT TO
37 CFR § 1.116**

25. (original) The computer readable medium of claim 22, comprising computer executable instructions for deploying the device database to the device as part of a device setup project.

26. (original) The computer readable medium of claim 25, wherein the computer executable instructions for deploying the device database to the device comprise computer executable instructions for distributing a finished version of the device database to the device.
